# Case Studies

## **Food and Drug Administration (FDA)**

Centennial Technologies provides ServiceNow implementation and management for the ServiceNow Software as a Service (SaaS) application on a \$50M BPA. We support the FDA by improving the agency's efficiency in managing, tracking, reporting, governance, and oversight while providing comprehensive workflows that support efficiencies, communication, collaboration, and resource sharing. We use ServiceNow Certified Developers and Administrators with federal experience working with ServiceNow on Development, Modernization, and Enhancement (DME) and Operations and

## **Department of Education (ED)**

Centennial Technologies provided advisory and support services to the Office of Chief Information Officer (OCIO), Office of Chief Data Officer (OCDO), and Office of Chief Financial Officer (OCFO) to support the modernization efforts in Infrastructure Management, Cloud Architecture, Data Management, Advanced Analytics, and Application Consolidation. Centennial developed a data modernization strategy and roadmap, established a Center of Excellence (DCoE) for Data, improving speed to insights, and selection of low-code and cloud platforms (ServiceNow, Appian, and Salesforce, AWS, and Azure). We managed over 60 highly complex enterprise systems to support 17 Grants Offices, eight Supporting Offices, and a Federal Student Aid (FSA) organization. The effort included supporting a 14k user base and 240+ million

## **United States Department of Agriculture (USDA)**

Centennial supports a ServiceNow FedRAMP moderate Platform as a Service (PaaS) solution encompassing TSM, ITOM, HAM, ITAM, and SecOps capabilities. We implemented the ServiceNow ITIL functionality, including incident, change, release management, and ITOM capability, using the Configuration Management Database (CMDB). This capability was created using a combination of mid-server-based discovery and SCCM inventory integration to provide software and hardware inventory. The solution supports 35,000 users and 40,000 devices, servers, and cloud devices.

## **Verizon Communications**

In support of Verizon's Business Strategy to accelerate the use of electronic medical records, Centennial supported the Office of Health Informatics Data and Analytics (OHIDA). We provided services with data architecture, governance, security, integration, interoperability, cleansing, analyzing, and disseminating insights gleaned from the health data. This includes providing managed and professional services to the World Health Organization, Emory Healthcare, Visionable, and other health organizations. Using our tailorable Data to Insights framework, we supported the development of the Verizon Medical Data Exchange (VMDE) platform to enable the digital sharing of physician-dictated patient notes, deployed a data repository (World Health Data Hub (WHDH)) for health-related statistics for 194 member countries, and implemented a Health Equity Assessment Toolkit (HEAT) for the examination of inequalities. VMDE sources data from 140+ major systems and 1128 sub-systems for data extraction, transformation, and consumption with over 320M users. WHDH platform gets data feed from 211 systems with a 80M user base and 48k+ supply chain vendors. The platform enables evidence-based decision-making to improve outcomes for scientists and doctors by delivering data insights and predictive analytics. Centennial provides O&M & DME support, including data integrity, data synchronization
